

Configuring ProCAT Profession/Student Version

ProCAT must be configured to output the realtime English translation to another running program's text input window such as Notepad. EV360 Ultimate's My Realtime and My Games receives the English translation during realtime skill development sessions.

Enabling Winner's RiTE module.

1. If you do not yet have your RiTE module enabled, call Advanced Translations Technology, Inc. customer service at (800) 966-1221 to get a RiTE code from the Winner main screen click Tools.
2. Click Register Options
3. Enter your new RiTE code on the optional code line, press the enter key. This will drop down to the Entered Options area.
4. Click Register

Configuring Winner's RiTE module:

1. Click Translate from Winner main screen.
2. Click Preferences
3. Click Text Entry
4. Check the box next to Activate Text Entry.
5. Click the Browse button.
6. In the Look In box, click the arrow to the right of Sys32.
7. Click C:\ drive.
8. Click Windows.
9. Click Notepad (some of you will see Notepad.exe)
10. Click Open.
11. Click OK

Important: It is important that you disable the audio synchronization feature of the CAT software program. This is a feature where your CAT software will record audio to your computer during a realtime writing session. If you are not sure how to disable audio synchronization, please check your CAT software program's user manual or help feature.
