BUILDING SPEED TO PASS TESTS IS HARD

DEVELOPING REALTIME ACCURACY IS HARDER

THEY DON'T HAVE TO BE!

EV360 Ultimate, with its optional [live class schedule](#), provides court reporting students, educators, and working professionals a proven alternative to other dictation websites, services, and software, making it the most successful court reporting teaching/learning platform available today. This comprehensive presentation will explain why.

"Every court reporting school/program that has closed since 2000 has NOT used EV360!"
Jay Vettickal, Executive Director at College of Court Reporting.

In the year 2000 there were over 90 NCRA approved/certified court reporting programs throughout the United States and Canada. Today there are less than 30. **Of these 30 programs, ~~13~~ are using EV360 as a supplemental resource for skill development.**

17

EV360 is an innovative approach to skill and speed development that no other platform can offer. EV360 is a tool that produces the results our profession needs: Schools are staying open and students are progressing. EV360 Ultimate, with its optional live class schedule, provides court reporting students, educators, and working professionals a successful alternative to other dictation websites, services, and software.

So why would a school adopt EV360 Ultimate? We have seen unprecedented success with the users following the full implementation of EV360. With schools' declining enrollments and increasing progression rates over the past ten years, we felt it was appropriate to develop a platform that allowed other schools to adopt the EV360 approach to court reporting skill development, self-evaluation, and testing. **We wanted our success to be experienced by other users and the profession.**

Building speed and developing realtime skills should not be a "one approach fits all." EV360 Ultimate incorporates seven independent modules that allow users to focus on developing skills to write faster, focus on realtime accuracy, self-evaluate transcriptions, attempt tests, and receive unique visual and human feedback. Sound familiar? Not so fast. Our software takes a unique approach to allow users to focus on each of these important elements independent of one another so the rate of speed progress is not impeded by focusing on speedbuilding skill development at the same time they are focusing on realtime skill development. **Developing these two skills are different. And when focused on at the same time, the rate of progression has slowed down so much because of the push for realtime. Students are taking, on average, almost 100 percent longer to get through school.** With EV360 Ultimate, we set out to fix this problem. Here's how.

1. **My Life** is a time-on-task tracking and time management module. Users can load their class schedule, academic classes, skill development tasks, and other life tasks to keep themselves organized.   **EV360 Ultimate automatically tracks total time for every event that occurs when the user is logged into the program**.

2. **My Speedbuilding** is a short workout approach to building speed. Audio, video, or text files are presented when users are writing, and the speed of the audio or text is adjusted in real time based on a selected workout plan. The concept is similar to a treadmill: The pace of the workout adjusts during the workout. **No starting/stopping/starting/stopping to adjust the speed of the dictation they are practicing.** We have over 40 workout plans (users can create their own, too) for them to select for any audio or text file they are practicing. We provide thousands of dictations with our proprietary packages, and we are continuously adding to our Community Coaching Package. Users can select their own audio files or text files and have our realtime workout plan variable speed player adjust the speed of those same files. You can even send us your own audio files and scripts, and we will build custom packages for your users. **Short workouts, adjustable realtime audio and text, modern-day workout approach to building speed.**
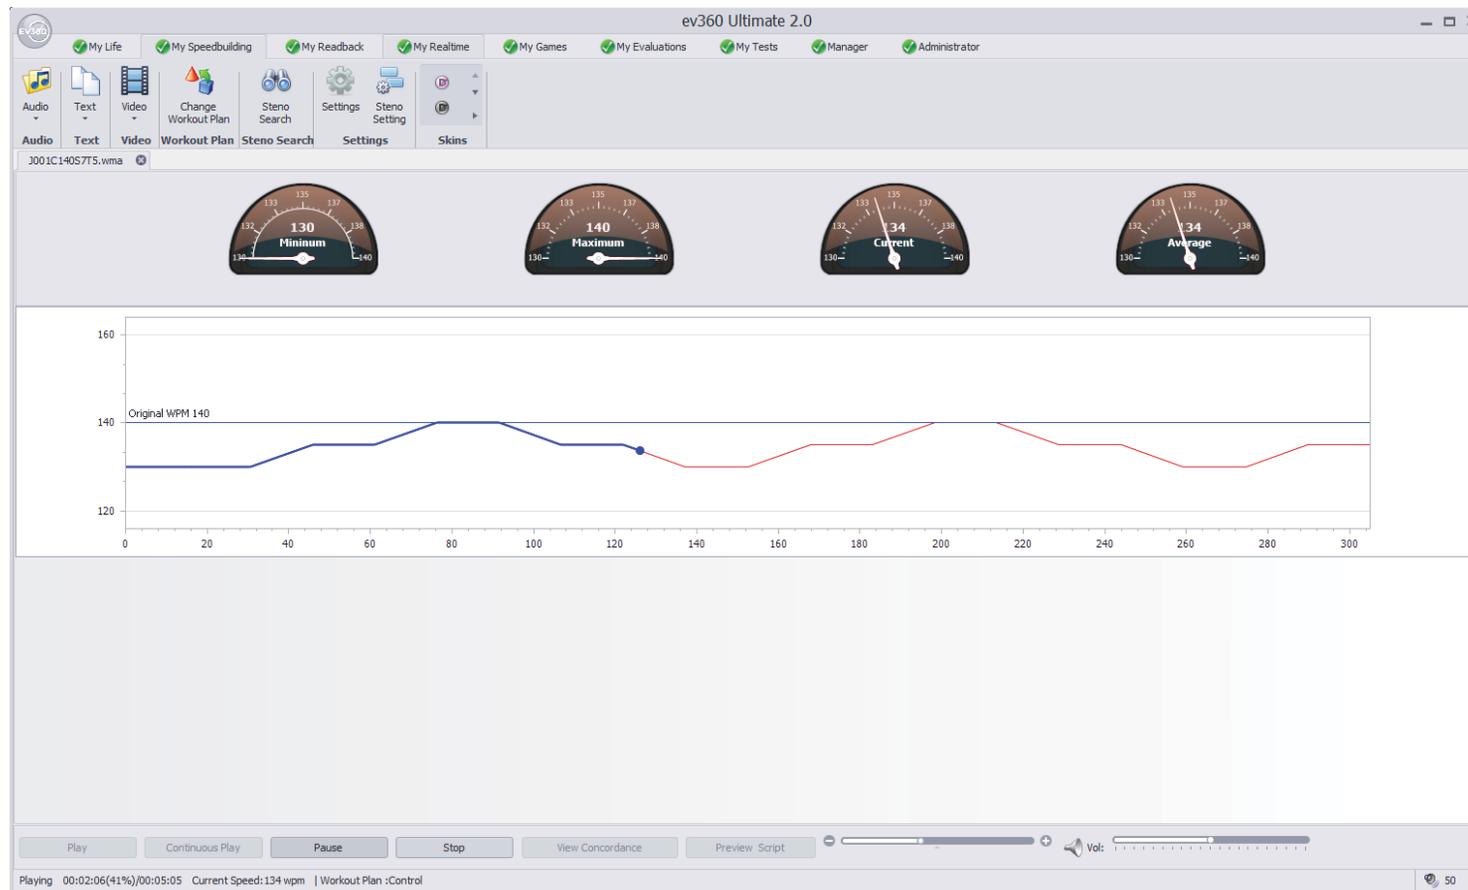

3. **My Readback** creates custom speedbuilding classes, like attending live speedbuilding classes, which present dictations based on structured lesson plans. Each audio class is broken down into six 1-minute audio segments that are repeated five times at varying speeds based on the selected lesson plan. The writing session is presented the same way users attend live speedbuilding classes with real teachers. **Structured class, longer practice sessions, old fashioned speedbuilding approach to building speed.**

4. **My Realtime** adjusts the speed as the audio is playing in realtime. **When the student is writing realtime to their CAT software, the audio speed is adjusted based on the student's translation percentage of accuracy.** If they are striving for 95 percent accuracy (adjustable user setting) and their translation is 95 percent or higher, our software will gently increase the speed. If their accuracy falls below 95 percent, the speed will gently decrease. This approach to developing realtime accuracy skills is a custom approach based on the user's actual realtime translation accuracy. No other speedbuilding platform is capable of realtime audio speed adjustments based on the user's translation accuracy. **Unique realtime audio speeds based on user's realtime ability, custom competency-based approach to realtime skill development.**
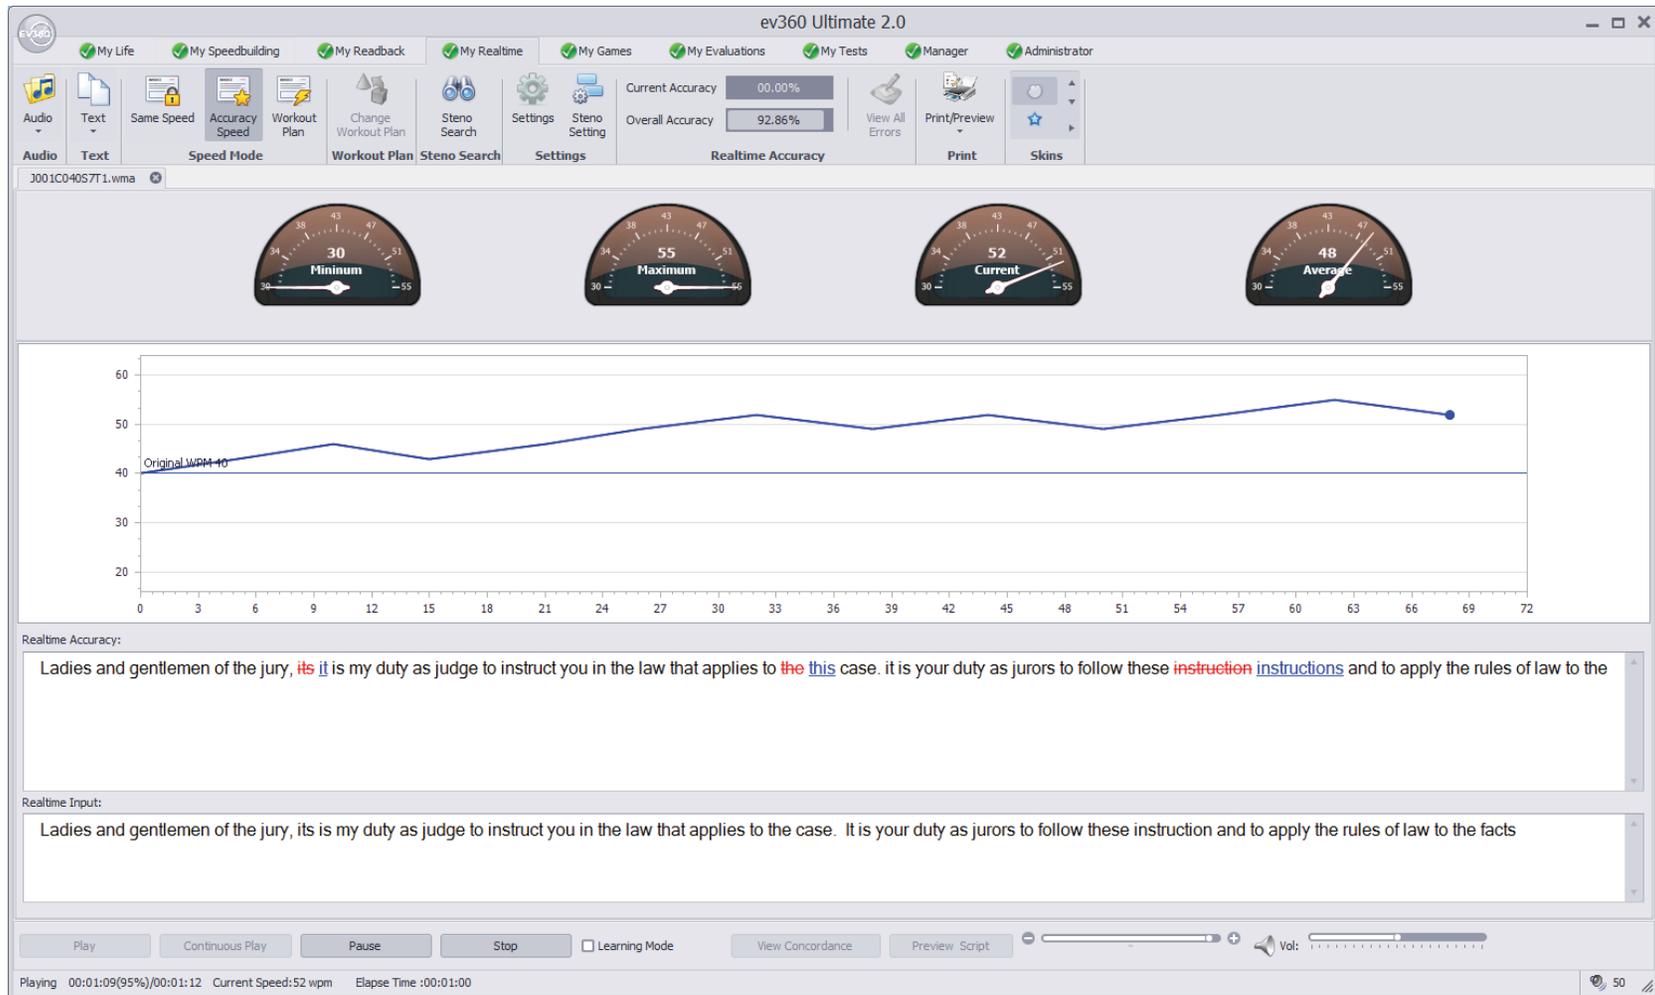

5. **My Games** is a **fun and addicting approach to developing realtime accuracy skills**. EV360 Ultimate includes two gaming modules, Word Invaders and Sharp Shooter. Both allow users to earn points when their writing translates accurately.

The Word Invaders game allows users to earn points when they stroke and translate the word invading their screen while using their CAT software. They earn various multiples of the original point value depending upon in which region they stroke the word correctly.
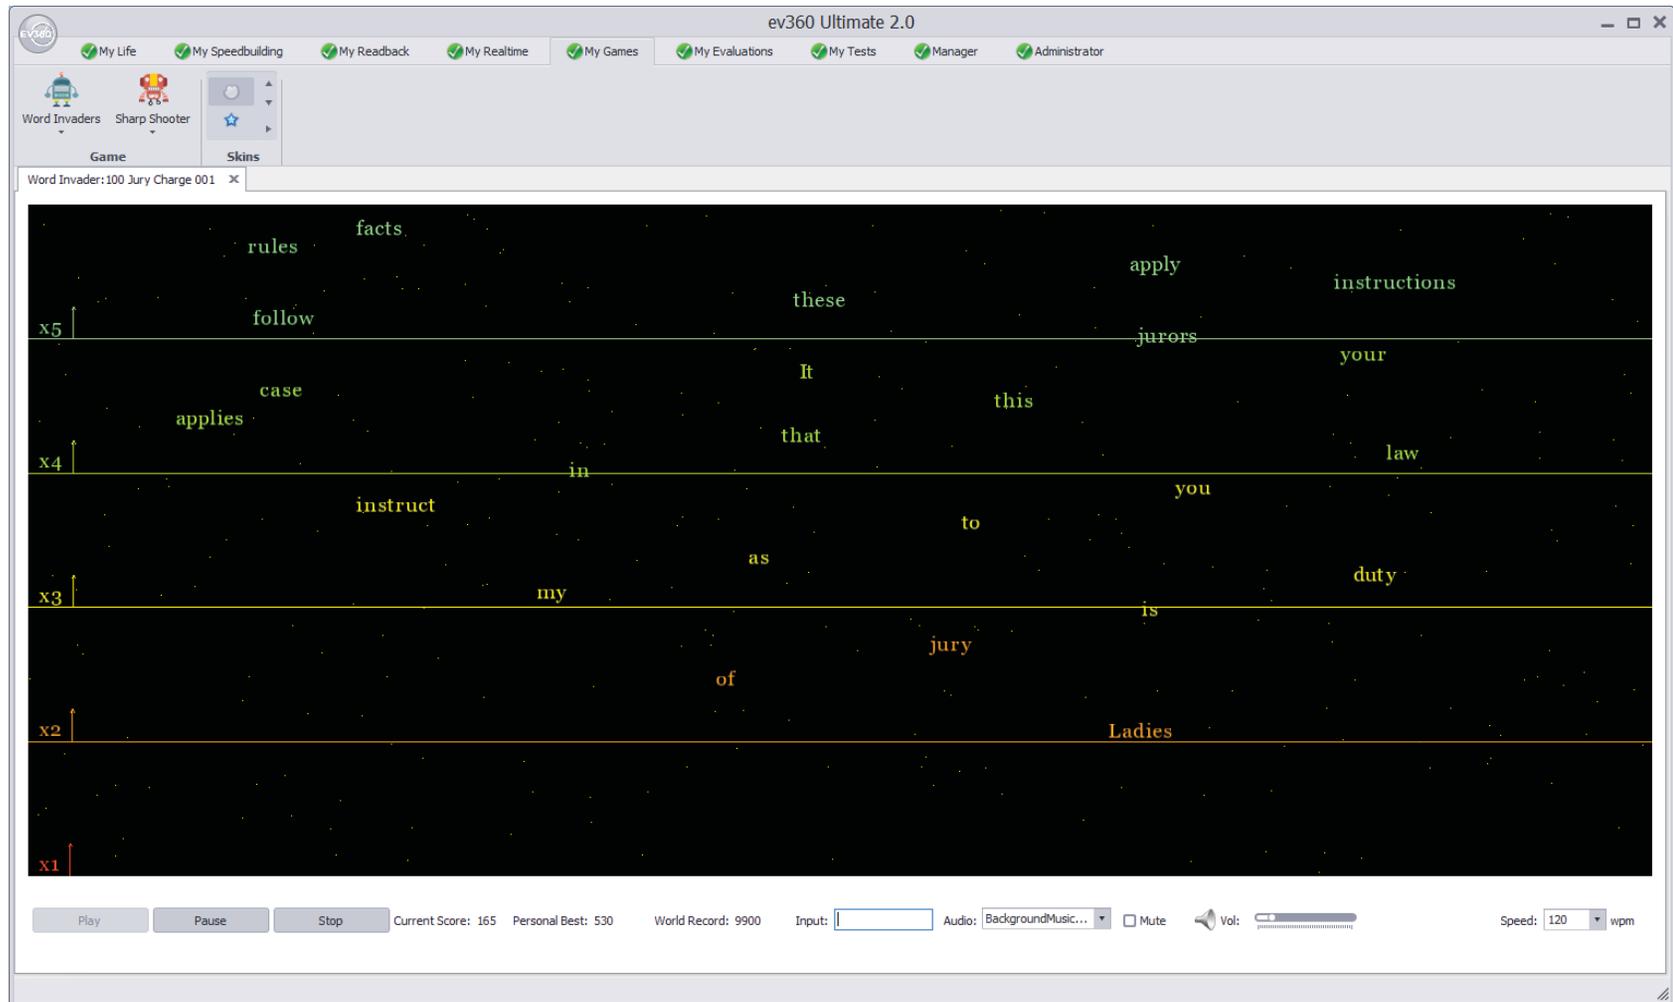

The Sharp Shooter game allows users to earn points when they stroke the word flying across the screen and it translates from their CAT software correctly. When they stroke the word correctly, the gun in the center of the screen shoots correctly translated word from the sky.
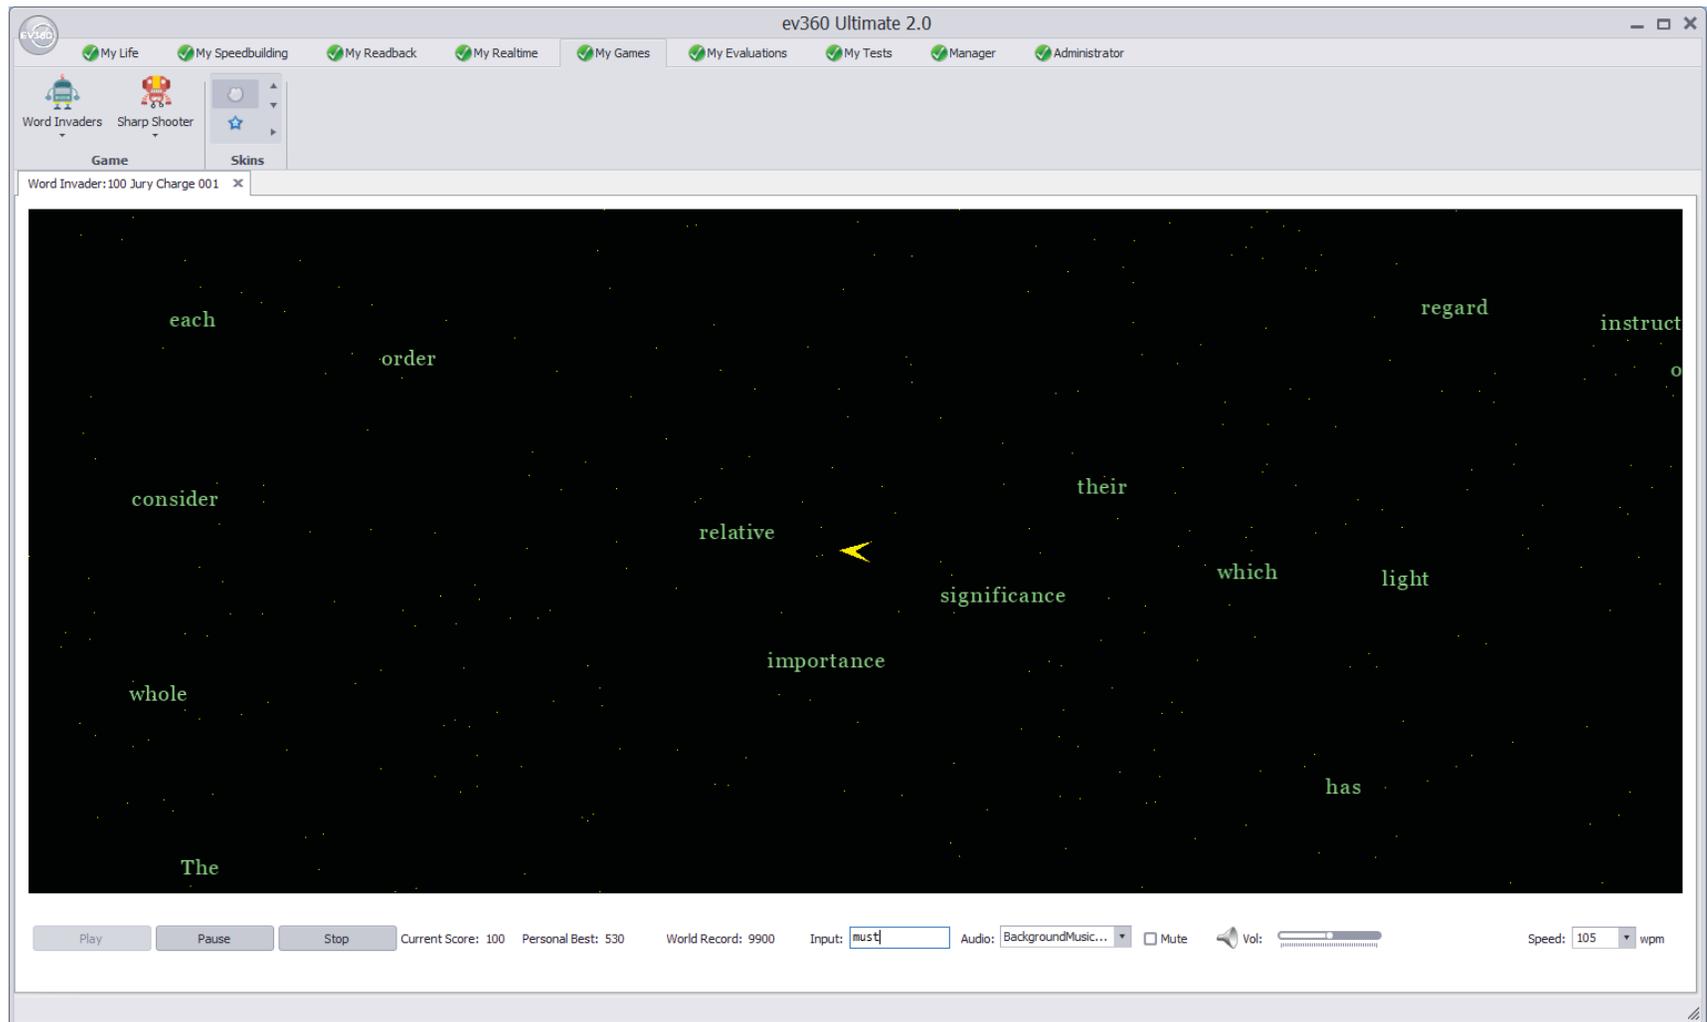

6. **<u>My Evaluations</u>** allow students to listen to an audio file at its natural speed. When the audio is complete, they have the option to either evaluate their realtime transcript or their edited transcript providing instant graded results. **Additional options allow users to generate practice documents to focus on their writing and transcription weaknesses.**

User Transcript

Ladies and gentlemen of the jury, ~~to~~ it is my duty as judge to instruct you in the law that applies to this case. It is your duty as jurors to follow these instructions and to apply the rules of law to the facts as you find them from the evidence. You must not be concerned with the wisdom of any rule of law stated in these instructions. Regardless of any opinion you may have as to what the law ought to be, it would be a violation of your oath to base a verdict upon any other view of the law than that given in the instructions of the court. If, in these instructions, any rule, direction or idea is repeated or stated in different ways, no emphasis thereon is intended by me and none may be ~~infer~~ inferred by you. For that reason, you are not to single out any certain ~~sentences~~ sentence or any individual point or instruction and ignore the others, but you are to consider all the instructions as a whole and regard each in the light of all the others. The order in which the instructions are given has no significance as to their relative importance. The evidence which you are to consider in this case consists of the testimony of the witnesses, the exhibits, and any facts /SAET admitted or agreed to by counsel. Statements, arguments and opinions of counsel are not evidence in the case. However, if the attorneys ~~stipulated~~ stipulate to the existence of a fact, you must accept the stipulation as evidence and regard that fact as proved. You must not speculate to be true any insinuations suggested by a question asked a witness. A question is not evidence and may be considered only as it applies meaning to the answer. You must disregard any evidence to which an objection was sustained by the Court and any evidence ordered stricken by the Court. Anything you may have seen or heard outside the courtroom is not evidence and must also be disregarded. You must decide all questions of fact in this case from the evidence received in this trial and not from any other source. You must not make any independent investigation of the facts or the law. Although you are to consider only the evidence in the case in reaching a verdict, you must bring to the consideration of the evidence your everyday common sense and judgment as reasonable men and women. Thus, you are not limited solely to what you see and hear as the witnesses testify. You may draw reasonable inferences from the evidence which you feel are justified in the light of common experience, keeping in mind that such inferences should not be based on speculation or guess. A verdict may never be influenced by sympathy, prejudice or public opinion. Your decision should be the product of sincere judgment and sound discretion in accordance with these rules of law. If, during this trial, I have said or done anything which as suggested to you that I am inclined to favor the claims or position of any party, you will not be influenced by any such suggestion. I have not expressed, nor intended to express, nor have I intended to intimate, any opinion as to which witnesses are or are not worthy of belief, what facts are or are not established, or what inference should be drawn from the evidence. If any expression of mine has seemed to indicate an opinion relating to any of these matters, I instruct you to disregard it. The credibility or believability of witnesses should be determined by their manner upon the stand, their relationship to the parties, their fears, motives, interests or feelings, their opportunity to have observed the matter to which he or she testified, the reasonableness of their statements and the strength or weakness of their recollections. If you believe that a witness has lied about any material fact in the case, you may disregard the entire testimony of that witness or any portion of that testimony which is not proved by other evidence. Certain testimony has been read into evidence from a deposition. A deposition is testimony taken under oath before the trial and preserved in writing. You are to consider that testimony as if it had been given in court. Under the Constitution and laws of this state, all private property is subject to the right of eminent domain which is the right of public entities to take private property for a public use upon payment of just compensation. This right is exercised through proceedings such as this action which is commonly called a condemnation action. The plaintiff herein is authorized by law to take the property here under consideration for the purpose of constructing what is commonly referred to as the Las Vegas beltway.

7. <u>My Tests</u> automate the delivery of speed tests. The application includes intuitive technology to administer evaluations based on individual user's qualifications, prerequisites, skill ability, current endurance, and transcription accuracy. The test library consists of 1-minute through 5-minute tests for jury charge, literary, and two-voice testimony. Additionally, when a user submits a transcribed test, they receive instant preliminary results, including total errors and percentage of accuracy. **No more waiting for evaluation results.** The My Tests module can be used for practice or can be an addition to your current method of testing. The screenshot below shows the final graded result. **Instructors are provided a set of tools to complete the grading and feedback process, such as color coding errors, annotating specific areas of the graded test, audio feedback messaging, auto calculation of errors, email notifications for test submissions and graded feedback.** The entire library consists of over 7,500 tests and added functionality for schools to create their own test packages.
